Adil Sarsembek

Systems Analyst / Monitoring Systems Engineer

Requirements · Data · Integrations

Astana, Kazakhstan | Office-based work | Available for business travel

adil04@Inbox.ru | +7 708 551 3925 | t.me/adil10961 | wa.me/77085513925

Profile

I work with government information systems across requirements, data and technical support. I gather requirements, describe processes, prepare technical specifications and define tasks for developers. I analyse SQL data and event logs, diagnose integration services and contribute to automating everyday tasks. My experience in information security and monitoring provides a technical foundation for analysing information systems, data and processes.

15-20 information systems | 2 500 monitoring sensors | Within the department's area of responsibility

Professional experience

Workforce Development Center JSC

Leading Expert Analyst | November 2025 - present

- Gather requirements, describe processes, prepare technical specifications and define tasks for developers; verify implementation.
- Diagnose integration services using event logs and SQL data.
- Coordinate incident resolution and verify the outcome.
- Develop and agree on procedures; prepare reports and formal records.
- Arrange access permissions and coordinate with the responsible departments.
- Handle official correspondence with government agencies.
- Configure PRTG and connect new monitoring targets.
- Modify Python/Bash scripts and SQL queries for information systems monitoring.

National Information Technologies JSC

Information Security Specialist / Incident Response Engineer | March 2025 - November 2025

- Recorded and analysed incidents, and worked with event logs.
- Identified responsible teams and supported issue resolution.
- Analysed and supported change requests for information systems and services.
- Monitored IT infrastructure, information systems, services and communication links.
- Performed initial diagnostics and responded to failures.

KaR-Tel LLP / Beeline

Technician | June - October 2024

- Installed internet connections, laid cables, and worked with routers, modems, set-top boxes and switches.
- Advised customers on telecommunications services.

Gosgradkadastr RSE

Work placement | March 2023

- Placement in the Digitalisation and Information Security Department.

Skills

Requirements and processes | Requirements, Processes, Specifications

- Gather and structure requirements, and describe processes.
- Prepare technical specifications and define tasks for developers; verify implementation.
- Develop and agree on procedures; prepare reports and formal records.
- Coordinate with responsible departments and government agencies.

SQL and databases | Oracle, PostgreSQL, SQL

- Work with Oracle and PostgreSQL: SELECT, WHERE, JOIN and GROUP BY.
- Search, filter and combine data, and perform aggregate calculations.
- Validate data and use SQL for incident diagnostics.
- Modify queries for information systems monitoring and reporting.

Metrics and visualisation | Grafana, Splunk, Zabbix, Cacti, PRTG

- Grafana: view, create and configure dashboards; analyse metrics, connect data sources and configure alert rules.
- Splunk: work with dashboards and alerts, search and analyse events, and use SPL queries.
- Zabbix: analyse charts and triggered alerts; configure items, triggers and notifications.
- Cacti: analyse traffic and load; add devices and configure data collection, graphs and templates.
- PRTG: configure monitoring and connect new monitoring targets.

Automation | Python, Bash

- Python: modifying scripts for monitoring, availability checks, and processing logs, files and data; automating routine tasks and reports.
- Bash: modifying scripts for monitoring, working with files and logs, automating Linux operations and preparing data.

Integrations | SOAP, REST API, SQL

- SOAP / REST API - basic knowledge.
- Diagnose integration services using logs and SQL data.
- Coordinate with responsible departments during issue resolution and verify the outcome.

Technical foundation | Linux, Windows Server

- Analyse event logs and perform diagnostics.
- Work with services and processes.
- Work with users, groups and access permissions.
- Check network connections and service availability.

Education and graduation project

Astana IT University | 2021-2024

Higher education · Cybersecurity

Graduation project: Developing a method for analysing techniques to counter a targeted phishing attack

Built an educational website covering the fundamentals of phishing protection. Implemented external link input, phishing checks through an external service and result display.

Additional training

2022 | Cisco | Introduction to Cybersecurity

2022 | Cisco | Cybersecurity Essentials

2023 | Cisco | IT Essentials

2023 | Cisco | CyberOps Associate

2023 | Cisco | Computer Networks Security

2026 | Cisco | Endpoint Security

2026 | Cisco | Python Essentials 1

2026 | Cisco | Python Essentials 2

2026 | Cisco | Introduction to Modern AI

2026 | OPSWAT | Introduction to Critical Infrastructure Protection

2026 | Stepik | Linux Terminal. Fundamentals

2026 | Stepik | Docker for Beginners

2026 | Lerna / Skillbox | Prompt Engineering Fundamentals

2026 | Astana Hub | AI Fundamentals

In progress | | Blue Team Interactive Range

International AI hackathon participant | HackAlem AI | 23 September 2026

Event record: 2,415 participants - a Guinness World Records achievement for participant count. Adil took part in the hackathon; the record belongs to the event.
